

## **ABOUT UNIQUE GLOBAL POSSIBILITIES**

**Unique Global Possibilities** is a US corporation with a global perspective. The corporation seeks unique solutions, through fundamental and applied research, to global medical, environmental and energy generation problems. Unique Global Possibilities undertakes research in the USA, Canada and Australia.

One focus of the corporation's research is the chemical and biochemical properties of water. An understanding of the unique chemistry of water, and water's role in determining the structure and function of biological molecules, provides the foundation for an understanding of all life processes including human health and longevity. An understanding of the unique chemistry of water provides also the foundations for sustaining a clean environment and generating clean energy for commercial and industrial use.

All research conducted by Unique Global Possibilities, and published by the corporation, is socially responsible and complies with the highest standards set by the World Health Organization (WHO) and the USA, Canadian and Australian governments.

Unique Global Possibilities primarily conducts medical, environmental and commercial energy research into problems that have global implications.
